Some people think that every student who stays in a hostel at UAEU should have their own bedroom and bathroom.

Do you agree **or** disagree?

Give two specific reasons with examples to support your opinion.

Model Essay (Agree)

These days education is very important and, many have to travel a long way from their home to go to university. Because of this they have to live at a university hostel. Some people think that every student who studies at UAEU should have a room and bathroom for themselves, I agree with this idea. There are many reasons for my opinion, however, in this essay I will give two. Firstly because privacy is important, and secondly it will let students focus on their studies.

The first reason I will look at is to do with privacy. I will explain, many students are teenagers and they like to have privacy so that they can arrange their own things and make their own schedule. For instance, one of my friends was not happy because he had to share his room, he could not relax or speak to his family because his roommate was always in the room listening to music.

The second reason that I will focus on is that students can study more easily if they have their own room. I will explain this point, to do homework and prepare for exams, it is better to do this in a quiet place with no disturbance. Also to go to bed and get up when you want to. For example some of my friends last semester were always late for class and got low grades in the final exam, they said that the problem was their roommates always stayed up late chatting and playing games.

In conclusion, this essay looked at the subject of living in hostels at UAEU, I think all students should have their own room. I gave two reasons to support this opinion, firstly students would have more privacy and secondly, they can study better. Therefore I suggest that the University administration build extra hostels, it will make the students study better and raise the grades of the university.

Model Essay (Disagree):

These days many students in travel along way from their home to study at UAEU so, they have to live in the hostel. Some people think that all students should have a private room, however, I disagree with this idea. In this essay I will discuss the two most important reasons firstly, it is too expensive for the university and secondly, students will not learn how to cooperate with each other.

The first reason is to do with cost. I will explain what I mean, today there are more students than bedrooms. If every student has their own room, the university will have to pay money to build more hostels. For example, the money could be used for other things like getting better teachers or to buy more books and laptops for the students.

The second reason I will look at is learning to cooperate with each other. I will explain, if students have their own room they will not learn how to deal with other people. For instance, my sister is very good at dealing with other people and when I asked her how she learnt this skill, she said it was because of having to share rooms with different people when she was at university.

In conclusion, this essay discussed the subject of whether or not students at UAEI should share hostel bedrooms. I think that they should share and I provided two reasons, it save the university money and it helps student learn how to deal with others. Because of this, I suggest that students focus on the advantages of sharing rooms and try to help their roommates by going to bed early on the nights before the important exams.
