How to become a medical doctor

Read the report below that describes the flowchart above. Fill in the gaps using the words from the box.

| | | | | |
|-------------------------|-------------------|--------------|-----------|--------|
| [if you do not want to] | [Finally] | [describe] | [overall] | [Then] |
| [if you want to] | [flowchart shows] | [After that] | [process] | |

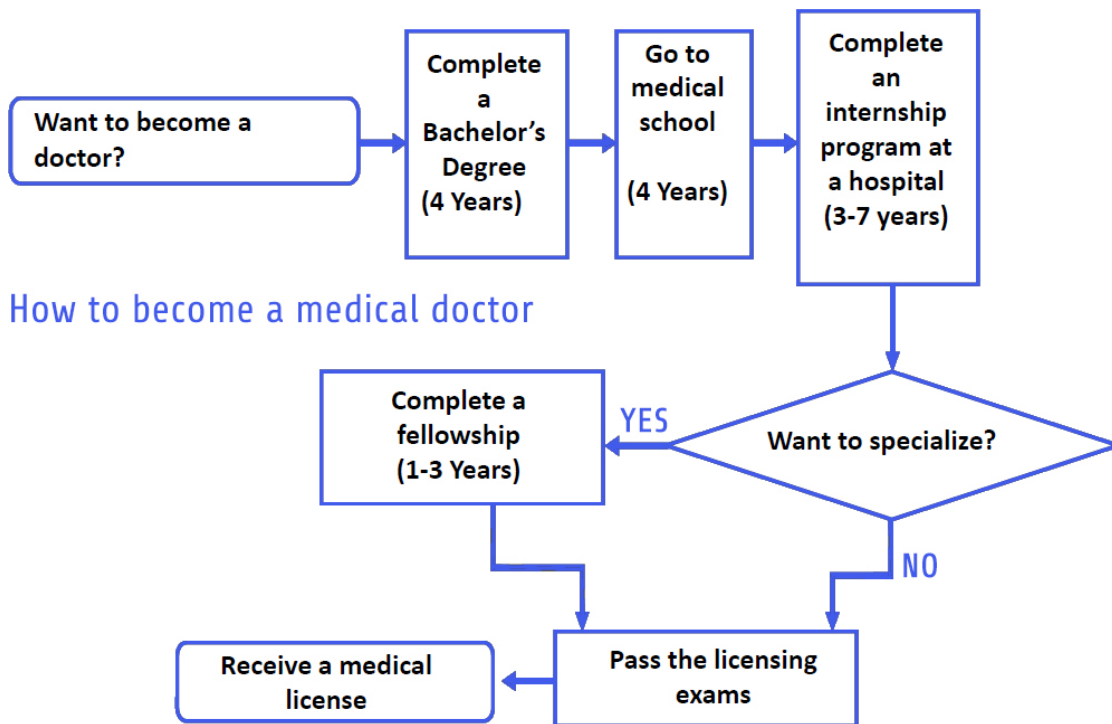

Report

The the steps you have to take to become a doctor. In this report I will these steps, we can see there are six steps in this

First, you complete a Bachelor's degree, this takes four years. Secondly, you will need to go to medical school and this also takes four years., you have to complete an internship as a hospital. This internship will take between three and seven years to finish. you will need to decide if you want to specialize or not. specialize, then you will need to complete a one to three year fellowship. specialize then you will take the licencing exams. All doctors must pass this exam., you will receive your medical licence.
